

ATN - CONVERTIBLE TIMING BELT SYSTEM

ATN® SYSTEM

ATN timing belts are available as open ended or welded endless belts. These timing belts are constructed of abrasion resistant polyurethane (Standard: 92 Shore A) and high strength steel or stainless steel tension members. Food grade, high ambient temperature, and cold - flexible polyurethane materials are available in all base belt versions. ATN timing belts are universally suitable for various positioning and conveying applications.

CHARACTERISTICS
